Measurement Notes: Planning Year: 2014-2015

Input the analysis you completed for your course specifically.

The projected score is a value that your department determines as a goal you want your students to achieve on a particular SLO.

The Sample Size is the number of students that took the assessment. If some students were absent, you may want to include the class size in the measurement notes.

The actual score is the score your students received (in this case (with the fake rubric), on average)

Make sure you select the appropriate class under select class.
